

SYAHRUL BHUDI FERDIANSYAH

Gresik, Indonesia | syahrul4w@gmail.com | +62 857 5556 6422 | github.com/SyahrulBhudiF | in/syahrulbhudif/ | ryuko.my.id

Informatics Engineering graduate with two years of experience building Fullstack web applications, with a focus on backend development. Skilled in TypeScript, Laravel, and Go for backend development, with frontend experience in Next.js and TanStack Start. Comfortable working in Linux environments, learning new technologies quickly, and collaborating on complex software projects.

Work Experience

Ariverse Studio - Part Time

May 2026 – Present

Software Engineer – Malang, Indonesia

- Maintained photobooth applications used by [dailycoverphotobooths](https://dailycoverphotobooths.com), deployed across devices throughout Indonesia, ensuring reliability, stability, and smooth day-to-day operations. Refactored legacy code, implemented an audit action log, and integrated Sentry for error monitoring.
- Productionized the company's Elysia/TanStack starter with multi-tenant RBAC, member/invite management, typed API contracts, async email, and automated Docker CI/CD to Dokploy.
- Defined project requirements, technical scope, architecture, and technology stacks.
- Coordinated interns across internal and external projects, including task planning, technical guidance, progress tracking, and code review support

Venturo Pro - Contract

March 2026 – Jun 2026

Web Programmer/Fullstack – Malang, Indonesia

- Engineered an end-to-end route-planning system for PT Catur Sentosa Adiprana Tbk., covering automated route generation, scheduling, OSRM-based distance calculation, conflict resolution, map visualization, persistence, and next-cycle planning.
- Optimized route generation using Golang concurrency patterns, bounded worker pools, async background jobs, and shared config preloading, reducing execution time by ~90%+ for 3,000+ records.
- Built rule-based scheduling with customer eligibility, priority scoring, visit frequency, TOP20 locking, special visit overrides, holiday exclusion, rest-time handling, per-day settings, and capacity constraints
- Implemented multi-tenant company/RBAC modules with company switching, JWT tenant context, branch restrictions, company-specific roles, permission guards, logo upload, and dynamic company theme settings.
- Contributed to cavos.io by developing automated SFTP recurring import workflows with encrypted CSV ingestion, scheduled daily imports, file validation, and background recipient creation jobs.

PT Sinergi Informatika Semen Indonesia - Internship

Feb 2025 – Dec 2025

Fullstack Developer – Jakarta Selatan, Indonesia

- Designed and implemented a robust backend architecture with Laravel and refactored legacy code to solve bugs and security issues.
- Redesigned the database schema for better performance, scalability, and adherence to best data management practices, and implemented a dynamic role-based access control (RBAC) system at app level to enhance security and user flexibility.
- Integrated Nextcloud for secure, scalable cloud-based document storage, optimized database queries for faster data retrieval, and improving document-upload performance by 70%.
- Enhanced WordPress performance at sobatbangun.com and visibility by implementing SEO optimization strategies, integrating heatmap analytics for user behavior tracking, and developing custom WordPress code solutions to extend functionality and improve user experience.

Oranji - Part Time

Sep 2024 – Aug 2025

Software Developer – Malang, Indonesia

- Delivered efficient code and acted as a system analyst to align user requirements with technical solutions.
- Analyzed user requirements and translated them into software specifications and database designs.
- Led the development team, coordinating tasks and ensuring smooth execution of processes.
- Implemented CI/CD with GitHub Actions, set up a Docker-based production environment, and optimized servers with Nginx and FrankenPHP.

PT Sthira Teknik Indonesia - Freelance

Jul 2024 – Dec 2024

Fullstack Developer – Yogyakarta, Indonesia

- Created a web platform for registration, payment processing, participant management, and administration of healthcare training programs at RSUD Prambanan, improving operational efficiency.

Projects

Pilannotator - Open Source (pilannotator.ai)

Jul 2026

Contributor

- Fixed a browser-session lifecycle bug where abandoned reviews kept remote port 19432 occupied, causing later annotation and review commands to fail with EADDRINUSE.
- Designed the Set-based session registry and cleanup flow used by the merged self-preemption path: stop stale same-process sessions, then retry the failed bind once.
- Added lifecycle coverage for cancellation, idempotent cleanup, and port-contention recovery.

TechStack : TypeScript, Node.js, Browser Automation

Dearly - Personal Project (dearly.ryuko.my.id)

Jul 2026 – Present

Fullstack Developer

- Built a private journaling application centred on a freeform canvas, enabling users to compose dated entries with rich text, photos, stickers, emoji, shapes, and layer ordering.
- Implemented calendar-based entries, undo and redo, clipboard paste, local drafts, and downloadable canvas snapshots to support a fluid writing and visual journaling workflow.
- Deployed the application on Cloudflare using Alchemy, with Effect and Foldkit powering the application architecture and canvas experience.

TechStack : TypeScript, Effect, Foldkit, Cloudflare, Bun, Turborepo, Alchemy

Anxiety Classification - Undergraduate Thesis Research Project

Dec 2025 – June 2026

Fullstack Developer

- Built a web application for collecting and analyzing facial micro-expression data from dual-camera recordings using Intel RealSense and standard webcams.
- Engineered dynamic questionnaires, dataset administration, video-review workflows, and analytics dashboards using TanStack Start, TypeScript, Supabase, and Python.
- Integrated real-time capture, event visualization, and classification outputs for anxiety-assessment research.

TechStack : TanStack Start, ReactJS, TypeScript, Supabase, Drizzle, Effect, Python, Websocket, TailwindCSS, Moonrepo, gRpc

Document Management System - PT Sinergi Informatika Semen Indonesia

Feb 2025 – June 2025

Fullstack Developer

- Initially contributed to maintaining and improving the existing legacy codebase by fixing stability and performance issues.
- Proposed and implemented a full system rewrite upon the manager's approval to achieve a cleaner, more scalable, and maintainable architecture. Rebuilt core backend and frontend components, integrated Nextcloud for secure cloud storage, optimized database performance, and developed Metabase dashboards

TechStack : Laravel, ReactJS, Inertia, Typescript, PostgreSQL, Redis, Docker, Nextcloud, Metabase

Vexora - Politeknik Negeri Malang

Aug 2024 – Dec 2024

Backend Developer & Machine Learning Engineer

- Created a mood-based music recommendation system that uses facial emotion detection to generate personalized playlists. Built the backend API using Go Fiber for performance and scalability, and deployed the CNN-based emotion detection model through FastAPI. Implemented K-Means clustering for music matching and integrated Redis caching to improve response times.

TechStack : Flutter, Go Fiber, FastAPI, Python, PostgreSQL, Redis, Docker, CNN, Tensorflow

Education

Politeknik Negeri Malang - Malang, Indonesia

Aug 2022 - Jul 2026

Bachelor Degree in Informatics Engineering 3.86/4.00

- KIPK outstanding students and education affirmation at State Polytechnic of Malang 2023

Organization Experience

Workshop Riset Informatika - Malang, Indonesia

Head of Web Developer Division

Feb 2024 - Jan 2025

- Led the Web Developer Division at Workshop Riset Informatika, overseeing strategic planning, resource allocation, and the successful execution of a web development miniclass. Managed a team of skilled professionals to ensure high-quality outcomes and project success.

Web Developer Mentor

Oct 2023 - Jan 2025

- Embarked on a new and exciting journey as a mentor in the field of website development, guide 100+ mentee and inspire the next generation of web developers.
- Entrusted with the responsibility of guiding aspiring web developers, providing them with support, insights, and encouragement to help them succeed in their educational and professional pursuits.

Skills

- **Languages**: TypeScript, JavaScript, PHP, Go, Python, Rust, SQL
- **Frontend**: React.js, Next.js, TanStack Start, Inertia.js, Tailwind CSS
- **Backend**: Laravel, Hono, Elysia, Nest.js, Gin, Echo, Fiber, FastAPI, REST API, gRPC, WebSocket, Microservices
- **Databases**: PostgreSQL, MySQL, MongoDB, Redis, Supabase, Drizzle ORM
- **DevOps & Tools**: Dokploy, Docker, Linux, CI/CD, Caddy, GitHub Actions, Git, Cloudflare, Alchemy
- **CMS & Analytics**: WordPress, ACF, Microsoft Clarity, Mouseflow
- **Soft Skills**: Problem Solving, Teamwork, Communication, Adaptability, Leadership
