

SYAHRUL BHUDI FERDIANSYAH

Gresik, Indonesia | syahrul4w@gmail.com | +62 857 5556 6422 | github.com/SyahrulBhudiF | in.syahrulbhudif/ | ryuko.my.id

Informatics Engineering student at Politeknik Negeri Malang with 2 years of experience in software development, focusing on Full-Stack Development with a stronger emphasis on backend. Experienced in frontend development using Next.js and TanStack Start with TypeScript, and backend development using TypeScript, Laravel, and Golang. Proficient in Linux environments, quick to learn new technologies, and adaptable to complex projects. Motivated to contribute effectively in collaborative teams while continuously improving technical expertise.

Work Experience

Ariverse Studio - Part Time May 2026 – Present

Software Engineer – Malang, Indonesia

- Maintained photobooth applications deployed across devices throughout Indonesia, ensuring reliability, stability, and smooth day-to-day operations.
- Planned software projects by defining requirements, technical scope, architecture, and suitable technology stacks based on project needs.
- Coordinated interns across internal and external projects, including task planning, technical guidance, progress tracking, and code review support

Venturo Pro - Contract March 2026 – Jun 2026

Web Programmer/Fullstack – Malang, Indonesia

- Engineered an end-to-end CSA route planning system covering automated route generation, scheduling, OSRM distance calculation, conflict resolution, map visualization, persistence, and next-cycle planning.
- Optimized route generation using Golang concurrency patterns, bounded worker pools, async background jobs, and shared config preloading, reducing execution time by ~90%+ for 3,000+ records.
- Built rule-based scheduling with customer eligibility, priority scoring, visit frequency, TOP20 locking, special visit overrides, holiday exclusion, rest-time handling, per-day settings, and capacity constraints
- Developed multi-tenant company/RBAC modules with company switching, JWT tenant context, branch restrictions, company-specific roles, permission guards, logo upload, and dynamic company theme settings.
- Contributed to cavos.io by developing automated SFTP recurring import workflows with encrypted CSV ingestion, scheduled daily imports, file validation, and background recipient creation jobs.

PT Sinergi Informatika Semen Indonesia - Internship Feb 2025 – Dec 2025

Fullstack Developer – Jakarta Selatan, Indonesia

- Designed and implemented a robust backend architecture with an emphasis on clean, reusable, and scalable code and refactored legacy code to solve bugs and security issues.
- Redesigned the database schema for better performance, scalability, and adherence to best data management practices, and implemented a dynamic role-based access control (RBAC) system at app level to enhance security and user flexibility.
- Integrated Nextcloud for secure, scalable cloud-based document storage, optimized database queries for faster data retrieval, and improved 70% overall system efficiency.
- Enhanced WordPress performance and visibility by implementing SEO optimization strategies, integrating heatmap analytics for user behavior tracking, and developing custom WordPress code solutions to extend functionality and improve user experience.

Oranji - Part Time Sep 2024 – Aug 2025

Software Developer – Malang, Indonesia

- Developed efficient code and acted as a system analyst to align user requirements with technical solutions.
- Analyzed user requirements and translated them into software specifications and database designs.
- Led the development team, coordinating tasks and ensuring smooth execution of processes.
- Implemented CI/CD with GitHub Actions, set up a Docker-based production environment, and optimized servers with Nginx and FrankenPHP.

PT Sthira Teknik Indonesia - Freelance Jul 2024 – Dec 2024

Fullstack Developer – Yogyakarta, Indonesia

- Developed a web platform for registration, payment processing, participant management, and administration of healthcare training programs at RSUD Prambanan, improving operational efficiency.

Projects

Dual-Cam Studio - Undergraduate Thesis Research Project Dec 2025 – Present

Fullstack Developer

- Developed a research-oriented web application for micro-expression and anxiety studies, featuring dual-camera video capture (Intel RealSense and standard webcam), a dynamic CMS-style questionnaire system, and an admin dashboard for dataset management and analytics.
- Implemented scalable frontend architecture using TanStack Start, managed complex form flows and state, and integrated real-time video capture and data visualization to support experimental and assessment-based workflows.

TechStack : TanStack Start, ReactJS, TypeScript, Supabase, Drizzle, Effect, Python, Websocket, TailwindCSS, Monorepo, gRpc

Sobatbangun.com - PT Sinergi Informatika Semen Indonesia Aug 2025 – Dec 2025

Frontend Developer

- Developed custom components and integration patterns on top of WordPress using ACF and shortcode-based logic to enhance flexibility and maintainability. Analyzed user interaction data from Microsoft Clarity and Mouseflow to improve UI structure, prioritize key elements, and reduce dead clicks.

TechStack : Wordpress, Microsoft Clarity, Mouseflow

Document Management System - PT Sinergi Informatika Semen Indonesia

Fullstack Developer

Feb 2025 – June 2025

- Initially contributed to maintaining and improving the existing legacy codebase by fixing stability and performance issues.
- Proposed and implemented a full system rewrite upon the manager’s approval to achieve a cleaner, more scalable, and maintainable architecture.
- Rebuilt core backend and frontend components, integrated Nextcloud for secure cloud storage, optimized database performance, and developed Metabase dashboards.

TechStack : Laravel, ReactJS, Inertia, Typescript, PostgreSQL, Redis, Docker, Nextcloud, Metabase

Gu Ru Studios Carya Course - Oranji

Backend Developer, System Analyst, & DevOps

Jan 2025 – Maret 2025

- Developed CMS and optimized backend services for a tutor booking platform connecting students with professional tutors for private and group lessons.
- Implemented secure authentication and real-time class scheduling, improved data models for scalability and transparency, and containerized the application with Docker for consistent deployment across environments.
- Configured Nginx and FrankenPHP to ensure reliable performance and maintainable DevOps workflows.

TechStack : Laravel, ReactJs, Inertia, TypeScript, MySQL, TailwindCSS, Docker, Nginx, FrankenPHP, Linux

Vexora - Politeknik Negeri Malang

Backend Developer & Machine Learning Engineer

Aug 2024 – Dec 2024

- Developed a mood-based music recommendation system that uses facial emotion detection to generate personalized playlists.
- Built the backend API using Go Fiber for performance and scalability, and deployed the CNN-based emotion detection model through FastAPI.
- Implemented K-Means clustering for music matching and integrated Redis caching to improve response times.

TechStack : Flutter, Fiber Golang, FastAPI, Python, PostgreSQL, Redis, Docker, CNN, Tensorflow

Web Training Healthcare Professionals - PT Sthira Teknik Indonesia

Fullstack Developer

Jul 2024 – Dec 2024

- Developed a web platform for registration, management, and administration of training and seminars for healthcare professionals at RSUD Prambanan, Yogyakarta.

TechStack : Laravel, ReactJs, Inertia, TypeScript, MySQL, TailwindCSS

Education

Politeknik Negeri Malang - Malang, Indonesia

Bachelor Degree in Informatics Engineering 3.83/4.00

Aug 2022 - Jul 2026 (Expected)

- KIPK outstanding students and education affirmation at State Polytechnic of Malang 2023

Organization Experience

Workshop Riset Informatika - Malang, Indonesia

Head of Web Developer Division

Feb 2024 - Jan 2025

- Led the Web Developer Division at Workshop Riset Informatika, overseeing strategic planning, resource allocation, and the successful execution of a web development miniclass. Managed a team of skilled professionals to ensure high-quality outcomes and project success.

Web Developer Mentor

Oct 2023 - Jan 2025

- Embarked on a new and exciting journey as a mentor in the field of website development, guide 100+ mentee and inspire the next generation of web developers.
- Entrusted with the responsibility of guiding aspiring web developers, providing them with support, insights, and encouragement to help them succeed in their educational and professional pursuits.

Skills

- Languages:** TypeScript, JavaScript, PHP, Go, Python, Rust, SQL
- Frontend:** React.js, Next.js, TanStack Start, Inertia.js, Tailwind CSS
- Backend:** Laravel, Hono, Nest.js, Gin, Echo, Fiber, FastAPI, REST API, gRPC, WebSocket, Microservices
- Databases:** PostgreSQL, MySQL, MongoDB, Redis, Supabase, Drizzle ORM
- DevOps & Tools:** Docker, Linux, Nginx, FrankenPHP, GitHub Actions, Git, Metabase, Nextcloud
- CMS & Analytics:** WordPress, ACF, Microsoft Clarity, Mouseflow
- Soft Skills:** Problem Solving, Teamwork, Communication, Adaptability, Leadership
